

**Suggested format for providing information relating to IWT in case of
new Thermal Power Plants in the country**

In case of Domestic Coal

1. Source of water linkage –
2. Name of the river / lake / water body in whose vicinity proposed Thermal Power Plant is located -
3. Whether the river / lake / water body is a National Waterway or linked to a National Waterway
 - (i) if yes, name of NW
4. Distance from National Waterway – *in Kms.*
5. Present status of inland water navigation on the said water body
6. Availability of water depth for IWT during
 - Wet season (June to November) - *in metres*
 - Lean season (December to May) - *in metres*
7. Whether views of IWAI has been obtained regarding status of navigability – *Yes or No*

In case of imported coal

8. Status of connectivity of port with IWT
9. Whether port is connected with a National waterway – *Yes or No*
10. Distance to which coal can be taken by IWT – *in Kms.*
11. Whether agreement has been signed with a logistics operator and IWAI / State IWT Department for transportation of coal from port to power plant – *Yes or No*
